# Advanced Training Workshop on NUTRITION SUPPORT IN THE BURN PATIENTS

## Background

The Indian Association for Parenteral and Enteral Nutrition (IAPEN) is an organization in the field of parenteral and enteral nutrition and promotes basic research, clinical research, advanced education, organization of consensus statements about clinical care and quality control. The Advanced Training Workshop on "Nutrition Support in the Burn Patients" is hosted and organized by IAPEN - Indore Regional Center in collaboration with Interburns Training Center, Choithram Hospital And Research Centre, Indore, MP, India.

## Aims and Objectives

*The workshop aim is to ameliorate and hopefully optimize the deranged metabolism resulting from burn injury and permit successful closure of the burn wound and resolution of the hypermetabolic state.*

## About Workshop

Nutrition support represents a critical component in the care of the acutely burned patient. Management of nutritional demands mandates attention to the unique hypermetabolic state that results from major burn injury; this pathophysiology results in loss of lean body mass, increased fat accretion and protein wasting, and impaired wound healing. Historically, failure to address these problems in victims of major burn injury often resulted in a fatal degree of inanition and death from infection and heart failure.

## Workshop Outcomes

Upon successful completion of this workshop, the candidate should be able:

- To know the principles of fluid resuscitation in burn patients.
- To be familiar with requirements for macronutrients and micronutrients in burn patients.
- To know the methods of administering nutrition in burn patients

## About Interburns Training Center (ITC)

The Interburns Training Center was formally started in January 2011 at Choithram Hospital and Research Center, Indore, India. The Choithram Hospital is a Private Charitable Trust 350 bedded Hospital with a 12 bedded Burn Unit admitting >220 acute burns and treating 1000 outpatients per year. The 4th Skin Bank in India was opened at the Burn Unit in February 2011.

The Interburns Training Center has been strategically placed at Indore because:

1. India has the highest global incidence of deaths from burn injuries
2. The Burn Unit has been run by a renowned burn care practitioner, Dr. Shobha Chamania since 1995 and has built an excellent burn care team and burncare model despite working within limited resources.
3. Burn training in the throughout the developing world is very limited. Until now most Trainees will visit the West for training and learn a large number of approaches and techniques not appropriate or possible for their local context. At the ITC comprehensive burn care can be taught and modelled which is relevant to the majority of contexts in Low Income Countries - and at a fraction of the cost.

## Interburns Training Center Team Members

Dr. Shobha Chamania, Surgeon  
 Dr. Ashwin Dash, Plastic Surgeon  
 Dr. Ashish Goel, Psychiatrist  
 Sr. Amni Verges, Nursing Superintendent,  
 Ms. Ranjana Chouhan, Psychologist  
 Mrs. Purnima Bhale, Dietitian  
 Mrs. Vibhooti Trivedi, Dietitian  
 Ms. Pratibha Sharma, Dietitian

## Advisory Members

Dr. Pierre Singer, Chairman Department of Intensive Care Institute for Nutrition Research, Rabin Medical Center Bellinson Hospital IL - 49100 Petah Tikva ISRAEL

Dr. Kishore R Iyer, Associate Professor of Surgery & Pediatrics, Director, Intestinal Transplantation & Rehab Program, Surgical Director, Pediatric Liver Transplant Program, Mount Sinai Medical Center, New York

Dr. Rémy Meier, Head Gastroenterology, Hepatology and Nutrition Department University, SWITZERLAND
